In the Claims

Claims 4, 6, 7, and 9 are pending and currently amended. Claims 1-3, 5, 8, and 10 are canceled with this Response. Claims 11-14 are new.

1-3.   (Canceled).

4.   (Currently amended) ~~The system of claim 3~~ A computer aided design workstation configured with communication links to select database storage comprising:

    (a)   a processor for implementing a stored program directed to presentation graphics; said processor further programmed to implement one or more software agents for enhancing and automating a presentation design sequence; said agent including programming for developing a common branding theme through multiple slides and seamlessly generating a common appearance through said multiple slides wherein said multiple slides collectively comprise a unified presentation; and

    (b)   a database for storing a library of Model slides having specific attributes to corporate-based identifying and/or industry related themes;

    wherein said presentation software agents include programming for automatically creating Title, Table of Content, and Standard Content slides during an initial phase of said sequence;

    wherein shapes can be added to Model slides having a common property set in compliance with a stored configuration file; and

    wherein said shapes are classified as either in compliance or non-compliant depending on whether a shape's associated property set matches a pre-set configuration file for that shape.

5.   (Canceled).

6.   (Currently amended) ~~The system of claim 5~~ A computer aided design workstation configured with communication links to select database storage comprising:

    (a)   processor for implementing a stored program directed to presentation graphics; said processor further programmed to implement one or more software agents for enhancing and automating a presentation design sequence; said agent including programming for developing a

common branding theme through multiple slides and seamlessly generating a common appearance through said multiple slides wherein said multiple slides collectively comprise a unified presentation; and

(b)   database for storing a library of Model slides having specific attributes to corporate-based identifying and/or industry related themes;

wherein presentation software agents include programming to automate a slide creation process; and

wherein the presentation software agents include programming to fix a linear toolbar horizontally across a display screen with plural slide management commands.

7.   (Currently amended) ~~The system of claim 5~~ A computer aided design workstation configured with communication links to select database storage comprising:

(a)   processor for implementing a stored program directed to presentation graphics; said processor further programmed to implement one or more software agents for enhancing and automating a presentation design sequence; said agent including programming for developing a common branding theme through multiple slides and seamlessly generating a common appearance through said multiple slides wherein said multiple slides collectively comprise a unified presentation; and

(b)   database for storing a library of Model slides having specific attributes to corporate-based identifying and/or industry related themes;

wherein presentation software agents include programming to automate a slide creation process; and

wherein said slide management commands comprise tabs and/or icons for triggering programs to implement help assistant; insert selected shapes, and toggle between print and projection formats.

8.   (Canceled).

9.   (Currently amended) ~~The system of claim 1~~ A computer aided design workstation configured with communication links to select database storage comprising:

(a)   processor for implementing a stored program directed to presentation graphics; said processor further programmed to implement one or more software agents for enhancing and automating a presentation design sequence; said agent including programming for developing a common branding theme through multiple slides and seamlessly generating a common appearance through said multiple slides wherein said multiple slides collectively comprise a unified presentation; and

(b)   database for storing a library of Model slides having specific attributes to corporate-based identifying and/or industry related themes;

wherein said database includes slide templates associated with team pages, tombstones, qualifications, copying pages and organizational charts.

10.   (Canceled).

11.   (New) A software-implemented method comprising:

(a)   developing a common branding theme through multiple slides and seamlessly generating a common appearance through said multiple slides wherein said multiple slides collectively comprise a unified presentation; and

(b)   storing in a database a library of Model slides having specific attributes to corporate-based identifying and/or industry related themes;

creating Title, Table of Content, and Standard Content slides during an initial phase of said sequence;

adding shapes to Model slides having a common property set in compliance with a stored configuration file; and

classifying said shapes as either in compliance or non-compliant depending on whether a shape's associated property set matches a pre-set configuration file for that shape.

12.   (New) A software-implemented method comprising:

(a)   developing a common branding theme through multiple slides and seamlessly generating a common appearance through said multiple slides wherein said multiple slides collectively comprise a unified presentation; and

(b)   storing in a database a library of Model slides having specific attributes to corporate-based identifying and/or industry related themes; and

automating a slide creation process, said automating comprising implementation of presentation software agents;

wherein said presentation software agents include programming to fix a linear toolbar horizontally across a display screen with plural slide management commands.

13.   (New) A software-implemented method comprising:

(a)   developing a common branding theme through multiple slides and seamlessly generating a common appearance through said multiple slides wherein said multiple slides collectively comprise a unified presentation; and

(b)   storing in a database a library of Model slides having specific attributes to corporate-based identifying and/or industry related themes; and

automating a slide creation process, said automating comprising implementation of presentation software agents;

wherein said slide creation process comprises adding tabs and/or icons for triggering programs to implement help assistant, inserting selected shapes, and toggling between print and projection formats.

14.   (New) A software-implemented method comprising:

(a)   developing a common branding theme through multiple slides and seamlessly generating a common appearance through said multiple slides wherein said multiple slides collectively comprise a unified presentation; and

(b)   storing in a database a library of Model slides having specific attributes to corporate-based identifying and/or industry related themes;

wherein said database includes slide templates associated with team pages, tombstones, qualifications, copying pages, and organizational charts.
